

# Ratcheting Cable Cutter 240 mm

ST72511

SATA cutting tools are cutting edge, equipping the doers of the world with the power and strength they need to do their best work. The razor-sharp blades on our utility knives come in folding or retractable versions, small enough to fit in a pocket but powerful enough to cut heavy-duty materials. These mini stainless steel blades are more than box cutters—they slice everything from drywall in the kitchen to heavy-duty cables in a repair shop, without compromising on safety. Our bolt cutters make quick work of locks or fencing, making them perfect for industrial or professional jobs cutting low- or medium-carbon steel. Their wide jaws but slim profiles give them incredible access, letting you work in tight areas.

## FEATURES

- Drop forged, precision ground alloy steel jaws for maximum durability and cut life
- Special ratcheting tooth mechanism
- Ergonomic handles and ratcheting action for comfort during repeated cuts
- Compact and lightweight design
- Unique 2-stage cutting design reduces the force required to cut cables
